

ACCOYA® grey

Where Outstanding Performance and Sustainability meet Contemporary Design

Accoya® Grey combines the natural beauty of genuine timber in an elegant grey finish with exceptional durability that lasts for many years. Manufactured from through-coloured grey Accoya® wood, it delivers outstanding performance together with a longlasting colour that requires minimal maintenance.

Long-lasting Colour – Low Maintenance – Easy Care

Accoya® Grey is an advanced colour variant of the well-established Accoya® wood already available on the market. During a specialized manufacturing process, Accoya® wood is infused with grey pigments throughout its structure.

The grey pigment particles are permanently integrated into the wood structure, ensuring they will not wash out over time. Cut ends and trimmed edges retain the same grey colour, eliminating the need for touch-up treatments, for example when installing decking boards.

The pre greyed Accoya® decking is easy to care for, requires very little maintenance, is highly resistant to splintering, and offers a smooth, pleasant tactile feel.

Like natural timber, Accoya® Grey displays the characteristic variations in colour and grain that make every board unique. Following the treatment process, it retains its natural appearance together with the outstanding dimensional stability and durability for which Accoya® is renowned.

Standard Dimensions

20 × 118 mm

20 × 142 mm

26 × 142 mm
